Swagger Maven Plugin Example `build passing`

This project is an example of using [Swagger-maven-plugin](#).

You can check the detail configuration in [pom.xml](#)

Clone the example in local and then launch:

```
mvn compile
```

You'll get the outputs in the */generated* folder.

> If you wanna see something before clone, I've uploaded the output files, you can view swagger outputs at [here](#), and [view the HTML output document](#)

Enjoy!
